

RESEARCH PARTICIPANT LAB GUIDE

- 1: Examine the Link building plan on the [Technical Home Page](#) to make sure you know the location of the required lab and understand the entry and exit points for the Link building.
- 2: Plan to arrive on time. There will be no waiting area and you may not be able to take part if arriving too early/late.
- 3: If you are feeling unwell or have been in close contact with someone showing symptoms of COVID19 within the last 48 hours then please cancel your session, even if on the same day that you are due to take part. You will not be penalised for non-attendance as long as you have informed the researcher. If you attend a session and appear to be unwell you may be turned away from the research area.
- 4: Go directly into the lab, follow the markings to the experimental testing area and make sure you follow the [participant lab protocol](#) (physical copy will be in each lab).
- 5: Complete the experimental process (in most cases all instructions will be provided without interaction with the researcher, however the researcher will be on hand for guidance in all cases).
- 6: Leave the lab and follow the directional marking to exit the building.
